

Control and noninterference layouts (4)

Prespecified transfer suite. Every panel uses identical coordinate limits and equal axis scale.

Start/agent $r=0.10$ $\rightarrow$ Heading $\theta=0$ Goal $r=0.25$ Obstacle

Obstacle, agent, and goal discs use the radii in the committed JSON definitions. Distances are environment-coordinate units.

Single-obstacle layouts (6)

Prespecified transfer suite. Every panel uses identical coordinate limits and equal axis scale.

Start/agent $r=0.10$ $\rightarrow$ Heading $\theta=0$ Goal $r=0.25$ Obstacle

Obstacle, agent, and goal discs use the radii in the committed JSON definitions. Distances are environment-coordinate units.

Two-obstacle layouts (8)

Prespecified transfer suite. Every panel uses identical coordinate limits and equal axis scale.

Three-obstacle layouts (6)

Prespecified transfer suite. Every panel uses identical coordinate limits and equal axis scale.
